EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with the applicant on 12/28/2005.

Claim 3 has been amended to read as follows:

(clean copy)

- - A protective cover attached to a radiator, which radiator is coated with thermal grease at a specific spot on the bottom thereof corresponding to a chip of a central processing unit, comprising:

a cover body with a bottom part and a periphery wall part, having a shape corresponding to the bottom of the radiator;

a support unit, providing a plurality of support block pieces attached to the inner side of the bottom part of the cover body and the support block pieces being disposed to surround an area corresponding to the thermal grease on the bottom of the radiator;

and a plurality of elastic engaging parts, being attached to the inner side of the periphery wall part of the cover body;

wherein, the elastic engaging parts detachably press against the periphery of the radiator and the support unit contacts the bottom of the radiator to space the bottom part of the cover body from the bottom of the radiator. - - .
